RECEIVED

DEC 13 1993

DIVISION OF
OIL, GAS & MINING

Reference: **New Monitor Wells**

Dear Mr. Jones:

As per your request, we are submitting the following information in regards to the two new wells at Goldstrike.

We have drilled and completed two new monitor wells MW-9 and MW-10 on site. The wells are 150 feet and 350 feet down gradient from MW-7, MW-10 being the closest of the two wells to MW-7.

Monitor well #9 was drilled to a depth of 250 feet and completed with 2 inch pvc casing as per the enclosed well log and completion record. On the first sampling of MW-9, which occurred on October 6, 1993, the standing water level in the pipe was at 209.20 feet.

Monitor well #10 was drilled to a depth of 150 feet. A copy of the completion record and well log is also enclosed. On October 4, 1993, the standing water level was at 82.90 feet.

The mine coordinates for each well are as follows with the elevation given being to the top of the 2 inch casing.

<u>Well</u>	<u>North</u>	<u>East</u>	<u>Elevation</u>
MW-9	9,247.3	12,333.7	4,754.12
MW-10	9,111.1	12,521.2	4,737.44
